Implementation of Bhineka Tunggal Ika

Understanding of the ‘Bhinneka Tunggal ika’’s values in the community multicultural/compound as the pillar of nationalism, as well as to give discourses and discordant advice to all parties, especially those responsible for implementation and decision’s makers in every institutions, that can be used as additional reference in determining regulation pertaining to actual understanding values of ‘Bhinneka tunggal ika’ by the community multicultural as the pillar of nationalism strong in the face of global changes, unity in diversity having a meaning describing the differences that owned indonesian, although different but those to whom we have constituting a unity of the country.

Bhinneka Tunggal Ika means different but unite, literally, it was shown in the Book of Sutasoma that A depiction of two tenets or different beliefs at that time, but basically have one thing in common purpose.

Pertaining to the understanding values Bhinneka tunggal ika who condition with the integration national in society multicultural, values the culture of the nation as a whole, unity, and the association of a nation state must remain maintained as pillars nationalism .If this is not a form, do unity the people will disappear without a trace, or will be established and able to survive under double-digit global values challenging unity a nation state (union states)? How to actualize understanding values to unity in diversity and this has been a problem in this study that realized and maintained in an enduring manner integration as the pillar of nationalism. There are several ways to make unity in diversity more down in the person of the community heterogeneous this, one of them is with social identification mutual differentiation a model of brewer & amp; Gartner (2003) applied on each of an individual in this people. Mutual differentiation model is a model by which somebody or certain groups who maintain identity origin (ethnic or regional) but simultaneously is it the group also having a common purpose which in turn united them all.
This model will bring a double identity that is hierarchical; with the sense of someone would not release identity origin and having a sense of identity with higher value. Ethnic identity or area lower in value and preferment than national identity, according to the signification unity in diversity itself, where the union is fixed price.

With the ultimate goal and the union will grow strong feelings because the growing similarity in society one another and Feeling of same water land, spirit and purpose is how would make the community heterogeneous become united, forming a national social identity stronger than the interests of the group, some and personal.

With admitting differences and respect differences in itself plus strong maintain pledge one islands, one nation and one language is a model social identification very fine in this people. So that interwoven cooperation between all groups without ever-offensive distinction because it has a main objective of and pride with on national unity.

Tolerance in the context of the country is an attitude appreciate each other, prohibit of discrimination and injustice from the majority of minority, whether tribe, cultural and religious in order to make sublime goal together.

Apart from issues nationality, challenges ahead in the future of this nation is face era of economic, capitalism that flourishing, imperialist, orientalist, infiltration of the views deviating from outside, and of domestic own as treason, fundamentalist and ‘the hurt’ aimed at muddy of the state, sparked conflict and gap so there the acts of with the results of the state of being keeps us from the achievement ideals sublime.
